CONTENTS — TABLE DES MATIÈRES — INHALT

PAGE

ALVEY, N. G., Methods likely to reduce the glasshouse area needed for experiments with the tomato 22

BECKING, J. H., Studies on nitrogen-fixing bacteria of the genus *Beijerinckia*. I. Geographical and ecological distribution in soils 49

BECKING, J. H., Studies on the nitrogen-fixing bacteria of the genus *Beijerinckia*. II. Mineral nutrition and resistance to high levels of certain elements in relation to soil type 297

BORST PAUWELS, G. W. F. H., Iodine as a micronutrient for plants 377

CORNFIELD, A. H., *Letter to the editors*. A simple technique for determining mineralization of carbon during incubation of soils treated with organic materials 90

DROBNIK, J., *Letter to the editors*. On the rôle of toluene in the measurement of the activity of soil enzymes 94

EMMERT, FRED H., Efflux and retention of foliar applied phosphorus – 32 and sulfur – 35 by intact bean roots, and the influence of various ambient ions on this relationship 33

GREENWOOD, D. J., The effect of oxygen concentration on the decomposition of organic materials in soil 360

HESSE, P. R., The decomposition of organic matter in a mangrove swamp soil 249

HESSE, P. R., Some differences between the soils of *Rhizophora* and *Avicennia* mangrove swamps in Sierra Leone . . . 335

ED IN STACKS

HEWITT, E. J., and BOND, G., Molybdenum and the fixation of nitrogen in *Casuarina* and *Alnus* root nodules 159

HOFFMANN, ED., und HOFMANN, G. G., Über die Zuverlässigkeit der Methoden zur Bestimmung der Aktivität von Bodenenzymen nach Ed. Hofmann 96

LARSEN, S., and COOKE, I. J., The influence of radioactive phosphate level on the absorption of phosphate by plants and on the determination of labile soil phosphate 43

LINDSAY, W. L., and DE MENT, J. D., Effectiveness of some iron phosphates as sources of phosphorus for plants 118

MCCOMB, E. A., and RENDIG, V. V., Effect of nutritional stress on plant composition. III. Characterization of the pectic substances in normal and sulfur-deficient alfafa 237

MCGARITY, J. W., Denitrification studies on some South Australian soils 1

PAPAVIZAS, G. C., and DAVEY, C. B., Extent and nature of the rhizosphere of lupinus 215

RATHJE, WERNER, *Letter to the editors*. Zur Möglichkeit der Düngung mit Rohphosphat 82

RATHJE, WERNER, Abhängigkeit der Löslichkeit der Phosphorsäure und des Kalis im Boden von der potentiellen Wasserstoffionenkonzentration 289

REES, W. J., and SIDRAK, G. H., Inter-relationship of aluminium and manganese toxicities towards plants 101

RENDIG, V. V., and MCCOMB, E. A., Effect of nutritional stress on plant composition. II. Changes in sugar and amide nitrogen content of normal and sulfur-deficient alfafa during growth 176

ROLL-HANSEN, JENS, *Letter to the editors*. Some striking observations on the occurence of fungi in steamed glasshouse soil 197

ROVIRA, A. D., and HARRIS, J. R., Plant root excretions in relation to the rhizosphere effect. V. The exudation of B-group vitamins 199

SCHEFFER, F., ULRICH, B., und KAUFMANN, H. J., Über die Phosphationenaufnahme durch Pflanzen. I. Phosphationenaufnahme durch Hafer als Funktion der Phosphatkonzentrationen in Nährlösung und Pflanze 264

SEEGER, J. R., Le problème de l'excrétion d'azote par les légumineuses. Premières recherches en région équatoriale 277

SENEWIRATNE, S. T., and MIKKELSEN, D. S., Physiological factors limiting growth and yield of *Oryza Sativa* under unflooded conditions 127

STEWART, W. D. P., and BOND, G., The effect of ammonium nitrogen on fixation of elemental nitrogen in *Alnus* and *Myrica* 347

TCHAN, Y. T., BALAAM, L. N., HAWKES, R., and DRAETTE, F., Study of soil algae. IV. Estimation of the nutrient status of soil using an algal growth method with special reference to nitrogen and phosphorus 147

TIMONIN, M. I., Effect of volatile constituents of *Scaptocoris Talpa* Champ. on the growth of soil fungi 323

VAIL J. W., PARRY, M. S., and CALTON, W. E., Boron-deficiency dieback in pines 393

WEDDING, RANDOLPH T., and BLACK, M. KAY, Uncoupling of phosphorylation in Chlorella by 2,4-dichlorophenoxyatic acid 242

WEIR, J. B., *Letter to the editors.* A comparison of the nodulation of diploid and tetraploid varieties of red clover inoculated with different rhizobial strains 85

WEIR, J. B., The effect of colchicine and indolyl acetic acid on diploid and tetraploid strains of red and white clovers in aseptic and pot culture 187
